

from said base to said arcuate section and means for mounting said base on a surface.

²
17. The holder of claim ~~16~~ wherein said first, second and third rods extend from points on said base which form the vertices of a triangle.

³
18. The holder of claim ~~16~~ wherein said third rod has an arcuate portion.

⁴
19. The holder of claim ~~18~~ wherein said arcuate portion of said third rod is joined to said arcuate section.

⁵
20. The holder of claim ~~16~~ wherein said base comprises a member extending generally perpendicular to said plane and wherein said third rods extends from said member.

⁶
21. The holder of claim ~~16~~ wherein said base has a generally rectangular configuration including two corners and wherein said mounting means are situated proximate said corners.

⁷
22. In combination, a hanger having a bottom member and a holder for said hanger, said holder comprising a base, first and second rods extending in a plane from spaced points on said frame for supporting the bottom said hanger, said first and second rods being connected by an arcuate section, at least a portion of said

12

arcuate section being inclined relative to said plane, a third rod extending from said base to said arcuate section and means for mounting said base on a surface.

⁸
~~23~~. The combination of claim ⁷~~22~~ wherein said hanger has a generally triangular configuration and wherein said first, second and third rods extend from points on said base which form the vertices of a triangle.

^{Sub D4}
~~24~~. The combination of claim 24 wherein said third rod has an arcuate portion.

¹⁰
~~25~~. The combination of claim ⁹~~24~~ wherein said arcuate portion of said third rod is joined to said arcuate section.

¹¹
~~26~~. The combination of claim ⁹~~24~~ wherein said base comprises a member extending generally perpendicular to said plane and wherein said third rod extends from said member.

¹²
~~27~~. The combination of claim ⁷~~22~~ wherein said base has a generally rectangular configuration including two corners and wherein said mounting means are situated proximate said corners.
